EXPLANATION OF GROUP SYMBOLS

GROUPS OF TYPES 11, 12, 13, and 14:
- A-Wrappers
- B-Leaf and smoking leaf
- C-Cutters
- X-Lugs and primings
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 21, 22, 23, and 24:
- A-Wrappers
- B-Heavy leaf
- C-Thin leaf
- X-Lugs
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 31:
- A-Wrappers
- B-Bright leaf, red leaf, and tips
- C-Lugs and cutters
- X-Trash and flyings
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 32:
- B-Heavy leaf or dull crop
- C-Thin leaf or bright crop
- X-Seconds and ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 35, 36, and 37:
- A-Wrappers
- B-Heavy leaf
- C-Thin leaf
- X-Lugs
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 41:
- B-Binders or tops
- C-Fillers (farm wrappers)
- X-Crop-run and stemming grades
- Y-Farm fillers or ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 42, 43, and 44:
- C-Fillers (farm wrappers)
- X-Crop-run and stemming grades
- Y-Farm fillers or ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 46:
- C-Superior
- X-Inferior
- Y-Defectuoso
- S-Scrap (Picadura)
- N-Nondescript

GROUPS OF TYPES 51, 52:
- A-Wrappers
- B-Binders, seconds, and brokes
- C-Fillers and short darks
- X-Stemming grades
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 53:
- B-Binders, seconds, and brokes
- X-Crop-run and stemming grades
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 54 and 55:
- B-Binders
- C-Fillers
- X-Crop-run and stemming grades
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 56:
- B-Binders
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 61 and 62:
- A-Wrappers
- B-Stout wrappers and binders
- C-Fillers or tips
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 81, 82, and 83:
- A-Wrappers
- C-Fillers
- S-Scrap

STOCKS OF LEAF TOBACCO OWNED BY DEALERS AND MANUFACTURERS

Total Stocks Slightly Larger Than a Year Ago

Stocks of all types [1] of leaf tobacco owned by dealers and manufacturers in the United States and Puerto Rico totaled 3,856 million pounds (farm-sales-weight) as of April 1, 1949 [2] - an increase of around 42 million pounds above the previous April 1.

The 1948 crops of most types had been marketed by April 1 this year. Exceptions were for Maryland, Pennsylvania filler, and Puerto Rican filler. Most of the Pennsylvania crop is normally marketed during the first quarter. It is estimated that around 120 million pounds of the 1948 crop were marketed during the first quarter.

For the southern types, the level of flue-cured stocks turned downward about 2 percent from the previous April 1, whereas increases were shown amounting to 4 percent for fire-cured, 6 percent for Burley, 3 percent for Maryland, and 4 percent for dark air-cured. Among the domestic cigar-leaf types the most significant changes compared with a year ago where a 16 percent decrease in Puerto Rican stocks and a 31 percent increase of Georgia and Florida shade-grown holdings.

1/ Figures quoted for type totals in this summary are the farm-sales-weight equivalent of reported stocks except foreign-grown leaf which is converted to an unstemmed equivalent basis only. Tables in the body of the report show stocks on a farm-sales-weight basis; stocks in detail on a reported weight basis, subdivided according to recognized groupings; and stocks owned by dealers and manufacturers, separately.

2/ The general instructions for filing the tobacco stocks reports, required of dealers and manufacturers by the United States Department of Agriculture, specify that the report shall be made as of the opening of business on the first day of each quarter.

CIGARETTE-LEAF STOCKS

Stocks of Flue-cured Down Slightly From a Year Ago; Burley, Maryland, and Turkish Higher

Stocks of flue-cured tobacco were 37 million pounds less than a year ago with holdings reported by dealers and manufacturers on April 1, 1949 totaling 1,767 million pounds. Exports of flue-cured leaf during the current marketing year have been at a higher rate than during the previous year while the 1948 crop was around 235 million pounds smaller than the 1947 crop. Between January 1 and April 1, 1949, flue-cured stocks declined approximately 256 million pounds.

Marketing of the large 1948 crop of Burley tobacco of around 600 million pounds was completed during the first quarter and stocks were boosted to 1,247 million pounds as of April 1, 1949. This was 73 million pounds greater than holdings on April 1, 1948 and established a new record level for this quarter. About 250 million pounds of the crop were marketed during the first quarter this year.

Maryland tobacco holdings were 38.4 million pounds this April 1 compared with 37.4 million a year ago. The auction markets for Type 32 do not open until the second quarter of the year following production. The bulk of the 1948 crop will be marketed during the May-August period of this year.

Stocks of Foreign-grown cigarette tobacco (Turkish and other) were 134.0 million pounds on April 1, 1949 compared with 126.8 million the previous April 1. This was the largest stocks on record for Type 90.

DARK TOBACCO STOCKS

Fire-cured And Dark Air-cured Stocks Show Increase

Stocks of fire-cured tobacco on April 1, 1949 totaled 203.2 million pounds - an increase of 7.8 million above the same quarter a year ago. Sales of the 1948 crop amounted to around 73 million pounds and were completed during the first quarter this year. Holdings of fire-cured tobacco were the largest as of April 1 since 1943. Stocks of Type 23 showed most of the increase contrasted with a slight decrease for Type 21. Fire-cured leaf stocks were divided as follows: Virginia 28.2 million pounds, Eastern District Tennessee and Kentucky 119.6 million, Western District 55.1 million, and Henderson Stemming 0.3 million.

Dark air-cured leaf holdings were 95.2 million pounds compared with 91.3 million the previous April 1. Sales of the 1948 crop amounted to around 35.0 million pounds and were completed during the first quarter. Larger stocks of Types 35 and 36 were held compared with a year ago whereas Type 37 holdings were approximately the same. Stocks of dark air-cured by types were 52.6 million pounds of One Sucker, 38.2 million of Green River, and 4.4 million of Virginia sun-cured.

Stocks of Cigar-filler Leaf Lower Compared With Previous April 1; Binder Holdings at Approximately Same Level; Shade Wrapper Stocks Higher

Cigar-leaf stocks of the domestic types including Puerto Rican totaled 346.3 million pounds (farm-sales-weight) as of April 1, 1949 compared with 352.0 million a year ago. Stocks of foreign-grown cigar tobacco on April 1, 1949 were 22.4 (unstemmed equivalent) million pounds which is a sharp decrease from the 29.7 million pounds on hand the previous April 1.

The cigar-filler stocks of the domestic types were 175.6 million pounds - a decrease of 6.6 million from a year ago. Stocks of Ohio filler were up 3.7 million from last April 1, while stocks of Puerto Rican tobacco were down 10.6 million pounds. Exports of Puerto Rican tobacco have been relatively large in recent months. The Pennsylvania Seedleaf stocks were not exactly comparable with most previous April 1 figures because much of the 1948 crop was unsold on April 1 whereas normally the bulk of the crop is marketed before this date. Stocks of cigar-filler by types were 86.3 million pounds of Pennsylvania Seedleaf, 32.3 million of Ohio filler, and 57.0 million of Puerto Rican filler of which 23.8 million were held on the Island of Puerto Rico and 33.3 million in the continental United States.

Stocks of the cigar-binder types of 150.7 million pounds were only slightly below the 151.5 million pounds on hand as of April 1 a year ago. Based on the increase in stocks between January 1 and April 1 this year, it appears that most of the 1948 crop of the Connecticut and Wisconsin binder types entered stocks during the first quarter. Except for Connecticut Valley Havana Seed which was up about 2 million pounds, stocks of each of the other binder types were slightly below the April 1, 1948 level. Larger exports compared with the previous year are a contributing factor to the slightly lower stocks. The production was also considerably lower for the Wisconsin types. Stocks of binder-leaf by types were 33.7 million pounds of Connecticut Valley Broadleaf, 26.3 million of Connecticut Valley Havana Seed; 2.1 million of New York and Pennsylvania Havana Seed, 45.9 million of Southern Wisconsin, 42.5 million of Northern Wisconsin, and 0.1 million of Georgia and Florida binder.

Shade-grown cigar wrapper tobacco stocks were 20 million pounds as of April 1, 1949 - an increase of 1.7 million compared with April 1, 1948. Practically all of the increase was in Type 62 holdings. Stocks of Connecticut Shade were 13.9 million pounds this April 1 and stocks of Georgia and Florida shade were 6.2 million.

Stocks of Foreign-grown cigar leaf had dropped to 22.4 million pounds on April 1, 1949 as against 29.7 million a year ago. All types of foreign-grown leaf stocks were lower but the bulk of the decrease was of Cuban leaf. Holdings of foreign-grown leaf by types were 21.8 million pounds of Cuban, 0.3 million of Sumatra and Java, 0.1 million Philippine Islands (Manila), and 0.1 million of other foreign-grown leaf.

Table 1.--*Average percentage of weight remaining after handling, sweating, drying, and stemming for all types of tobacco, and factors used for adjusting stocks reported by dealers and manufacturers to a farm-sales weight equivalent* 1/

SOUTHERN TYPES (11-37)

Type	Type No.	Yield realized from farm-sales weight to:					Stemming		Factors used to multiply by to convert reported stocks	
		Packed in domestic order				Packed weight export order	Yield from actual weight at time of operation	Yield from farm-sales weight	Stemmed stocks to unstemmed equivalent	Unstemmed stocks to farm-sales weight equivalent 2/

Foreign-grown cigarette and smoking tobacco	90	—	—	—	—	—	—	—	4 1.205	(5)

[1] Information in this table taken from U. S. Department of Agriculture Circular 435, Tobacco Shrinkages and Losses in Weight in Handling and Storage, issued in July 1937. [2] Factors for converting unstemmed stocks to farm-sales weight are adjusted on the basis of an average loss on the reported weight and should not be taken as indicative of full shrinkage after handling, sweating and storage. [3] Ohio-Miami Valley filler types of tobacco packed in cases by growers before delivery. [4] Tentative factor. [5] Factor has not been determined.

Table 2.-Stocks of leaf tobacco owned by dealers and manufacturers, by types, converted to a farm-sales-weight equivalent, April 1, 1949, compared with other quarters 1/

1/ For factor used in converting weights see table 1 except for cigar leaf. The instructions for reporting unstemmed cigar-leaf of the domestic types require dealers and manufacturers to indicate the weight basis on which the tobacco is reported, namely farm-sales-weight, marked weight, or sweated weight. The stocks are converted to the farm-sales-weight equivalent on the basis of the amount reported in these three categories. The conversion factors by types of tobacco for April 1, 1949 are as follows: Type 41, 108; Types 42-44, 112; Type 51, 106; Type 52, 106; Type 53, 112; Type 54, 105; Type 55, 106; Type 56, 124; Type 61, 109; Type 62, 114. Factors shown in Table 1 used prior to October 1, 1948. April 1, 1949 figures subject to revision.

2/ For explanation of stocks included in this classification, see footnote 6 on page 13.

3/ Foreign-grown leaf is converted to an unstemmed equivalent basis only.

4/ Does not include Sumatra and Java leaf stored in the Free Trade Zone.

* Revisions in January 1 report.

Continued -

Table 3.--Stocks of leaf tobacco, by types and groups of grades, owned by dealers and manufacturers, April 1, 1949, compared with January 1, 1949 -- Cont'd.
(REPORTED WEIGHT)

1/ Subject to revision.

2/ See Supplementary Burley report on page 14.

3/ Most of the stocks in the X and Y groups will go into scrap chewing manufacture as well as part of that included in the scrap group.

4/ Includes Puerto Rican on the Island, Type 46.

5/ Type 84.- Other foreign-grown all shown in the C group.

6/ Although Type 73 is defined as all domestic types of tobacco not otherwise classified, the bulk of the stocks reported in this type consists of cuttings, clippings, and trimmings. This is the result, in most instances, of the inability of reporters to designate cuttings, clippings, and trimmings in the "S" group of the types to which they properly belong.

7/ Does not include Sumatra and Java leaf stored in the Free Trade Zone.

* Revisions in January 1 report.

1/ These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners subject to provisions of the Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress. The quantities owned by dealers and manufacturers have been tabulated separately on a type total basis.

2/ The quantities shown as owned by manufacturers include tobacco which is held under dealer registries of manufacturers and also tobacco held by dealers and known to be purchased on order for foreign or domestic manufacturers. The quantities shown as owned by dealers may include some tobacco held by dealers which is earmarked for sale to domestic manufacturers or for export. The table should therefore be considered as representing only the approximate quantities owned respectively by dealers and manufacturers.

3/ Includes stocks on the Island of Puerto Rico.

4/ For explanation of stocks included in this classification see footnote 6 on page 13.

5/ Does not include Sumatra and Java leaf stored in the Free Trade Zone.

1/ These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperetive associations, warehousemen, brokers, holders, and owners except (a) the original growers of tobacco; (b) manufacturers who in the first three quarters of 1948, according to the returns of the Commissioner of Internal Revenue, manufactured less than 35,000 pounds of tobacco, less than 185,000 cigars, or less than 750,000 cigarettes, pursuant to the provisions of the Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress.

2/ Subject to revision.

3/ For explanation of stocks included in this classification see footnote 6 on page 13.

4/ Does not include Sumatra and Java leaf stored in the Free Trade Zone.

* Revisions in January 1 report.
